PERSONAL DETAILS

My name is Rubén Martínez Candela and I am from Elche (Alicante) in Spain. I was born on 13th December 1983 and I studied at "Aitana de Fomento" school until my A-Levels. Currently, I study IT Engineering at the University of Alicante and I only have two subjects left to finish my degree. I am looking for a first job in the ICT business; I am really looking forward to beginning to apply what I have learnt during all these years of study and learn new things while I carry on with my training during my career.

WORK EXPERIENCE

I have never had a permanent job in the IT business but over the years I have done several projects autonomously with very good and not so good results. I have also worked in temporary jobs to finance my degree.

EELQH - RADIOBOX — 2009

Actualmente estoy construyendo la plataforma web y de distribución de contenidos online de una pequeña radio que está empezando. Comenzamos el proyecto en el mes de octubre y esperamos que a finales de noviembre ya tengamos la versión 1.0 online y dando servicio.

Contacto: Adrián - estoesloquehay@radiobox.es

PRÁCTICAS EN EMPRESA - CCOO; SAN VICENTE DEL RASPEIG, ALICANTE — 2009

On the work experience I did during my degree, I was in charge of migrating the webpage of the trade union called Comisiones Obreras in the University of Alicante to a more appropriate social network for the 2.0 philosophy, which currently reigns on the net. Using the platform Ning.com with hacks of CSS and JavaScript, and using the APIs of Google™ CODE, I have personalised not only the aspect, but also the operation of the Ning.com platform in order to adapt it to the CCOO's needs.

ONLINE SHOP ACE, JOSE LUIS CANO; ALICANTE, ALICANTE — 2008

ACE used to be a brand for mats and other car accessories that Mr. Jose Luis Cano wanted to put on the market and he decided to do it with an online shop. I worked together with a university colleague to analyse his needs and we designed an online shop project adapted to his needs. After a few months, we agreed on the terms of the contract and we had a draft of the website "frontend". Unfortunately, we did not get to sign because of the lack of funds. The web interface would be 2.0 (JavaScript, ajax, rss, etc...) using libraries such as Scriptaculous to speed up the work. For the online shop we installed the application Magento, which is opensource, in a Debian server.

Contact: Jose Luis Cano, jlcano@comalcar.com

PHOTO LAB TECHNICIAN, FOTOCOLOR FLASH S.L.; ELCHE, ALICANTE — 2004-2005

Tasks related to the job. I also learned some notions of graphic design and photo retouch with photoshop.
Contact: Juan José, (0034) 966 661 515

ACADEMIC DETAILS

- Experto Universitario en Administración de Redes de Computadores (EUARC) - Cisco Networking Academy (Curso '09/'10)
- University of Alicante, San Vicente del Raspeig, ALicante — Currently studying IT Engineering, (1 subject).

COMPLEMENTARY DETAILS

Driving license in force, can provide own transportation, availability to travel.

APTITUDES

I consider myself as a dynamic and lively person. I enjoy learning new things and put them into practice and I always like to finish what I start. I am creative in my solutions and I like to think twice before judging and acting. Because I am aware of my limitations, I try not to take on more projects that I can perform. I always try to set achievable targets on short/medium term and divide my projects into small and simpler parts. I pick up things very quickly and I am wide open to share my knowledge with other people. I consider work-team as a key point for personal development and I adapt easily to new situations. I do not consider myself a leader but, if time comes, I would adopt this role with no problems, since I would take it as a personal challenge.
